Upload CSV
Import FAA SDR records from a CSV on your computer. Required columns: RegistryNNumber, DifficultyDate (MM/DD/YYYY), OperatorControlNumber.
Drag & drop a CSV, or click to browse
.csv only — max 10 MB
Ingesting writes to the connected graph. Uploading the same file again is safe: records already stored are counted as already in graph and left unchanged.
Ingested 800NN_first_two_rows.csv

1
Skipped: no tail number
0
Skipped: bad date or no record ID
0
Nothing new: all 2 valid rows were already in the graph.
Corpus Ingest (server file)
Import a CSV that is already on the API server. The path is read on the server, not on your computer.
CSV Path
Row Limit (Optional)
Service history intelligence for maintenance teams
