| | Gate item | Result | Evidence and caveat |
|---|---|---|---|
| A | Functional app with real asset and graph history | Met | Staging health: Neo4j graph mode, live model, 2,079 records (checked 18 October 2026) |
| B | Diagnosis succeeds with a live model or reports a limitation | Partly met | Full explanations with a live model locally; on staging fresh diagnoses returned no explanation text on 16 October (cause not established, not rechecked). The limitation is reported by the API, not hidden |
| C | A cited record opens the real source record | Met | Deep links from evidence to the history page; tests in `AssetHistory` and `Diagnostics` |
| D | Conflict workflow visible and testable | Met | Review queue and corrections tabs; 32 conflict-engine tests |
| E | Tests and build run in GitHub Actions | Met | Run 39068741787 on commit `36a98a3`: backend 194 passed, frontend 171 passed, Docker smoke passed |
| F | Tag or commit, setup, tests, evidence, contributions documented | Partly met | Setup guide, evidence documents and this report exist. **[CONFIRM: release tag name and commit once created]** |
