Component	Responsibility	Main files
React application	Pages for assets, history, service records, diagnostics, review, graph, ingest; every failure state shown honestly	`frontend/src/pages`, `components`, `utils`
API client	One Axios instance and the functions for every endpoint	`frontend/src/api/client.js`
API routes	HTTP contracts, validation, controlled errors (404, 409, 422, 503)	`backend/api/routes`
Ingest agent	Validated, idempotent loading of FAA records; explicit skip counts	`agents/maintenance_agent.py`
Retrieval and ranking	Bounded graph context; deterministic ranking; copilot context and ranking delta	`services/diagnostic_retrieval.py`
Citation validation	Extract FAA-shaped identifiers and check them against the graph	`services/citation_validation.py`
Conflict engine	Candidate pairing, classification, adjudication, confidence, routing	`services/conflict_engine.py`, `conflict_screen.py`
Analysis state and budget	Honest unanalysed state; per-day request and token budget	`analysis_state.py`, `analysis_budget.py`
Model client	Calls Groq; rejects empty content; bounded retries	`services/groq_service.py`
