Method	Path	Purpose and contract notes
GET	`/api/health`	Runtime mode and record count
GET	`/api/maintenance/assets`	Aircraft with record counts, one aggregation query
GET	`/api/maintenance/assets/{id}/history`	One aircraft's records; keyed by the aircraft UUID; unknown returns 404
GET	`/api/maintenance/records`	Fleet-wide list: filters, deterministic pagination
POST	`/api/maintenance/records`	Submit one record and process it
POST	`/api/maintenance/ingest`	Ingest a CSV already on the server
POST	`/api/maintenance/ingest/upload`	Multipart CSV upload, same ingest
GET	`/api/maintenance/review-queue`	Records awaiting review
POST	`/api/maintenance/review-queue/{id}/approve` or `/reject`	Review action; reject needs a note; 409 if not reviewable
GET	`/api/maintenance/corrections`	One row per `SUPERSEDES` edge with a summary
GET	`/api/maintenance/analysis/status`	Analysis coverage and label counts
POST	`/api/maintenance/analysis/run`	Batch analysis, at most 25 records; needs the operations token and a live model
