File	Tests	What it covers
Backend (PyTest): 194 tests, of which 145 need no database		
`test_conflict_engine.py`	32	Candidate pairing, classification parsing, adjudication, confidence, routing
`test_conflict_cascade.py`	11	Cost cascade: screen, voting, budget
`test_api_maintenance.py`	27	Maintenance endpoints and failure paths
`test_diagnostic_retrieval.py`	26	Bounded retrieval, ranking, tie-breaks, copilot ranking
`test_api_copilot.py`	10	Copilot contract and failure behaviour
`test_maintenance_agent.py`	10	Ingest: validation, duplicates, orphan repair
`test_citation_validation.py`	6	Identifier extraction and checking
`test_backfill_conflict_scores.py`	6	Resume, budget stop, bounded retries
`test_api_diagnostics.py`, `test_ops.py`, `test_conflict_analysis_migration.py`	4, 3, 3	Diagnose contract, operations endpoints, legacy-placeholder migration
`test_regression_software.py`	7	Frozen legacy domain still works
`test_graph_maintenance.py`	9	Repository contract against memory and real Neo4j (runs in CI)
Frontend (Vitest): 171 tests in 15 files		
`Diagnostics.test.jsx`, `DiagnosticsCopilot.test.jsx`, `diagnosticsUtils.test.js`	29, 4, 24	Diagnose and Copilot states, safety, contract
`ServiceRecords.test.jsx`	22	Fleet list, filters, pagination, deep links
`ReviewQueue.test.jsx`	18	Queue, server-confirmed actions, corrections
`Graph.test.jsx`, `graphScope.test.js`	18, 10	Graph selection, counts, edge styling
`MaintenanceIngest.test.jsx`, `ingestClient.test.js`	17, 1	CSV upload flow and errors
`AssetHistory.test.jsx`, `Assets.test.jsx`	12, 3	History, failure states, list
