ID	Scenario	Result	Evidence and caveat
T01	Application opens the maintenance workspace	Pass	Route smoke log; `Sidebar` tests. Browser console was not audited systematically
T02	API lists loaded assets	Pass	`test_api_maintenance`; staging lists 118 aircraft
T03	Selected asset history is displayed	Pass	`AssetHistory` tests; Figure 6.7
T04	Diagnosis returns graph-backed evidence and ranking	Partly	Full result with a live model locally (Figure 6.2); on staging fresh diagnoses returned no explanation text on 16 Oct (not re-checked)
T05	Explanation cites a real record that opens	Pass	`test_citation_validation`; Figure 6.3, "12 cited record IDs verified"
T06	Unknown asset request	Pass	Controlled 404, "Aircraft not found", no invented history
T07	Model unavailable	Pass	HTTP 503 with a reason; Figure 6.5
T08	Empty or ambiguous evidence	Pass	Explicit "no relevant history" result; ranking withheld when there is no evidence
T09	Review queue shows a known case	Pass	Figure 6.8
