Tool	Where it is recorded in the repository	Recorded use
Claude Code (Claude Sonnet 5.5)	`Co-Authored-By` trailers on the commits it helped write; the frontend, knowledge-bank and evidence documents	Frontend code and tests (work packages S1–S5 and PRs #3, #4, #8–#14), knowledge-bank and evidence documents, the one-aircraft analysis run, and the drafting of this report from the repository and its evidence
OpenAI Codex	`docs/mid1/15_report_mid1_addendum.md`	The 16 October integration audit: inspecting repository state, proposing scoped edits, running tests and builds, drafting engineering documentation
Cursor	`Co-authored-by: Cursor` trailers on five commits (four on 11 July, one on 15 October); `.cursor/rules`; `docs/mid1/22_cursor_handoff_2026-10-17.md`	Backend work and hand-offs recorded in the repository; **[CONFIRM: Umar and Usman to state which work packages used Cursor and for what]**

Member statements.

Member	Tools	Used for, and what the member verified
Shahmeer	Claude Code	Frontend and documentation. Verified every change by running the tests and the build, by mutation checks on new tests, by live checks in a browser against a running backend, and by reading each diff before merging
Umar	**[CONFIRM: tools]**	**[CONFIRM: purpose and verification]**
Usman	**[CONFIRM: tools]**	**[CONFIRM: purpose and verification]**

Checks applied to tool output. Code produced with a tool was accepted only after (1) the automated tests and the build passed, (2) for new tests, a mutation check showed that the test fails when the protected code is broken, (3) the behaviour was checked live
